SKILLS

- HTML5, CSS3
- JavaScript (ES6+)
- React JS
- MySQL, MongoDB
- Python Programming
- Version Control (Git, GitHub)

EDUCATION

Bachelor of Computer Application, Vellore Institute of technology

CGPA: 6.9/10

2020 – 2023

Vellore, IN

PROJECTS

Real-Time Chat Application,

Technologies Used: MERN Stack, Socket.io, Tailwind CSS, DaisyUI, Zustand, JWT.

- Led a team in building a real-time chat application using the MERN stack and Socket.io, delivering seamless instant messaging with online user status updates for an engaging experience.
- Spearheaded the implementation of JWT-based authentication and authorization, ensuring data security while efficiently managing global state with Zustand.

Music Player,

Technologies Used: MERN Stack, React.js, TypeScript, Socket.io, Tailwind CSS, Zustand, JWT,

- Led the development of an interactive music streaming platform, enabling users to play, skip, and adjust volume effortlessly while tracking what others are listening to in real time.
- Oversaw the integration of real-time chat and online/offline status features, enhancing user engagement and interaction within the platform.

E-Commerce Website,

Technologies Used: MERN Stack, React.js, TypeScript, Redis, Stripe, Tailwind CSS, JWT.

- Features product and category management, shopping cart, coupon codes, and secure Stripe payments for a seamless shopping experience.
- Utilizes MongoDB and Redis for efficient data handling, JWT authentication with refresh/access tokens, and an admin dashboard for full control.
